

THE NEW **PACKAGING SYSTEM**

BY **SEALPAC**®

TenderPac

Well-matured, appetizingly presented

With TenderPac SEALPAC presents a dual-compartment vacuum packaging system, which creates the optimal conditions for maturing meat products, such as beef.

The meat's drip-loss is diverted into a second packaging compartment. As a result, the system ensures hygienic storage and an appetizing product presentation that remains during the entire shelf life.

Benefits:

- Optimal microbiology
- Maximum shelf life
- Perfectly tuned to meat maturation
- Tender in structure, full of flavour
- Attractive presentation at retail

DUAL-COMPARTMENT SYSTEM, **UNIQUE RESULT:**

TenderPac

TenderPac by SEALPAC creates the best conditions for fresh red meat in the pre-packaged segment. Produced from flexible PA/PE film, this dual-compartment vacuum pack can be presented standing or hanging in the retail shelves. Its special film characteristics are perfectly tuned to the maturation process of fresh meat.

A second compartment, separated by a porous seam and covered by a pre-printed film or label, neatly collects the drip-loss by means of the specially developed SEALPAC ActiveStick. This ensures that the meat is stored dry and appetizingly during its entire shelf life. Even after opening TenderPac, the consumer will not come into contact with the drip-loss.

The TenderPac system guarantees an appealing and consumer-friendly presentation of any maturing meat product. It convinces with excellent tender meat quality and aromatic flavour.

Advantages at a glance:

- Dual-compartment vacuum pack with hygienic separation of meat and drip-loss
- Improved colour and optimized maturation process
- Maximum shelf life
- Secure and sturdy packaging
- Attractive vertical or horizontal product presentation
- Tender in structure, full of flavour
- Including consumer notice on the ActiveStick

TenderPac is available on SEALPAC's complete range of RE-series thermoformers.
